

GameView Feature Guide: Video Uploads and Scoreboard Customization

This guide covers additional features available in your GameView scoreboard system, including media uploads and visual customization.

1. Upload and Play Videos on the Scoreboard

You can upload sponsor videos, team hype videos, or special announcements to display during games or school events

Steps to Upload Videos:

- Save Video in MP4 format on a Thumb Drive, in a folder named “media”
Example: E:\media\yourvideo.mp4
- In the GameView App, under settings, select **Update Scoreboard**
- You can now Play/Pause/Stop the video in the Media tab.
Note: Playing videos while the clock is playing videos will be played with the scoreboard visible. When the clock is not running the video will play full screen.

Tip: Make sure your scoreboard's volume is connected and unmuted if your video has sound.

2. Customize Your Scoreboard Appearance

Make your scoreboard visually unique to your school, team, or sponsors.

GameViewBoards.com Dashboard:

- Update the scoreboard background image
- Select the scoreboard font type
- Update team mascots

Pro Tip: Use high-contrast text over dark backgrounds for the best visibility in gyms.
